

## APPLICATION FOR SUBMITTAL OF POST-APPROVAL DOCUMENT

This application is for submittal of documents, after the initial approval of the project (post-approval documents), that require Division of the State Architect (DSA) review and approval. This form shall be completed by the Design Professional in General Responsible Charge of the project, in accordance with California Code of Regulations, Title 24, Part 1, Sections 4-317, 4-323 and 4-338 and in compliance with DSA IR A-6: Construction Change Document Submittal and Approval Process.

DSA documents referenced within this form are available on the [DSA Forms](#) or [DSA Publications](#) webpages.

<b>1. SUBMITTAL TYPE: (Is this a resubmittal? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>)</b>			
Deferred Submittal <input type="checkbox"/>	Addendum Number: <b>001</b>	Revision Number: <b>V2</b>	CCD Number: _____ Category A <input type="checkbox"/> or B <input type="checkbox"/>
<b>2. PROJECT INFORMATION:</b>			
School District/Owner: <b>Muscatel Middle School   Rosemead School District</b>		DSA File Number: <b>19 91</b>	
Project Name/School: <b>New Automatic Fire Alarm and Voice Evacuation System at Entire Site</b>		DSA Application Number <b>03 118779</b>	
<b>3. APPLICANT INFORMATION:</b>			
Date Submitted: <b>12/08/20</b>		Attached Pages? No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> Number of pages? _____	
Firm Name: <b>NAC Architecture</b>		Contact Name: <b>Gary Christofi</b>	
Work Email: <b>gchristofi@nacarchitecture.com</b>		Work Phone: <b>(323) 475-8075</b>	
Firm Address: <b>837 N. Spring St. Third Floor</b>		City: <b>Los Angeles</b>	State: <b>CA</b> Zip Code: <b>90012</b>
<b>4. REASON FOR SUBMITTAL: (Check applicable boxes)</b>			
<input checked="" type="checkbox"/> For revision or addendum prior to construction.		<input type="checkbox"/> For a project currently under construction.	
<input type="checkbox"/> For a project that has a form DSA 301-N: Notification of Requirement for Certification, DSA 301-P: Posted Notification of Requirement for Certification or a 90-Day Letter issued.			
<input type="checkbox"/> To obtain DSA approval of an existing uncertified building or buildings.			
<input type="checkbox"/> For Category B CCD this is: <input type="checkbox"/> a voluntary submittal, <input type="checkbox"/> a DSA required submittal (attach DSA notice requiring submission).			
<b>5. DESIGN PROFESSIONAL IN GENERAL RESPONSIBLE CHARGE:</b>			
Name of the Design Professional In General Responsible Charge: <b>Helena Jubany</b>			
Professional License Number: <b>C22214</b>		Discipline: <b>Architect</b>	
<b>Design Professional in General Responsible Charge Statement:</b> The attached post-approval documents have been examined by me for design intent and appear to meet the appropriate requirements of Title 24, California Code of Regulations and the project specifications. They are acceptable for incorporation into the construction of the project. <b>Signature:</b>  <div style="text-align: center;">DESIGN PROFESSIONAL IN GENERAL RESPONSIBLE CHARGE</div>			
<b>6. CONFIRMATION, DESCRIPTION AND LISTING OF DOCUMENTS:</b>			
For addenda, revisions, or CCDs: CHECK THIS BOX <input checked="" type="checkbox"/> to confirm that <i>all</i> post-approval documents have been stamped and signed by the Responsible Design Professional listed on form DSA 1: Application for Approval of Plans and Specifications for this project. (For Deferred Submittals, refer to IR A-18: Use of Construction Documents Prepared by Other Professionals, and IR A-19: Design Professional's Signature and Seal (Stamp) on Construction Documents, when applicable, for signature and seal requirements.)			
Provide a brief description of construction scope for this post-approval document (attach additional sheets if needed): <b>Due to delays in manufacturing of the Fire Lite Fire Alarm Panel, replacement approved Fire Alarm components manufacturer's (Honeywell) model from "Fire-Lite" to "Silent Knight"</b>			
List of DSA-approved drawings affected by this post-approval document: <b>FA001, FA002 and FA004</b>

## CODES, STANDARDS & GUIDE

### List of 2016 California Code of Regulations (C.C.R.)

#### Applicable Codes Effective January 1, 2017:

- 2016 California Building Standards Administrative Code,
- 2016 California Building Code, (CBC), Part 2, Title 2  
(Based on 2015 Edition International Building Code with 2016 California Amendments)
- 2016 California Electrical Code,  
(Based on 2014 National Electrical Code with 2017 California Amendments)
- 2016 California Mechanical Code,  
(Based on 2015 IAPMO Uniform Mechanical Code with 2016 California Amendments)
- 2016 California Plumbing Code,  
(Based on 2015 IAPMO Uniform Plumbing Code with 2016 California Amendments)
- 2016 California Energy Code,  
(Based on 2015 Edition California Energy Commission Building Energy Efficiency Standards)
- 2016 California Fire Code,  
(Based on 2015 International Fire Code with 2016 California Amendments)
- 2016 California Existing Building Code,  
(Based on 2015 International Existing Building Code with 2016 California Amendments)
- 2016 California Green Building Standards Code,
- 2016 California Reference Standards,  
(Partial List – See CBC Chapter 35 and CFC Chapter 45)

#### Applicable Standards and Guide:

- 2016 Edition NFPA 13 Installation of Sprinkler System (California)
- 2016 Edition NFPA 14 Installation of Standpipe and Hose Systems (California)
- 2017 Edition NFPA 17 Dry Chemical Extinguishing Systems (California)
- 2016 Edition NFPA 17A Wet Chemical Extinguishing Systems (California)
- 2016 Edition NFPA 20 Installation of Stationary Pumps for Fire Protection (California)
- 2016 Edition NFPA 24 Installation of Private Fire Service Mains (California)
- 2016 Edition NFPA 72 National Fire Alarm Code (California)  
(Note see UL Standard 1971 for )
- 2015 Edition NFPA 253 Critical Radiant Flux of Floor Covering Systems (California)
- 2012 Edition NFPA 2001 Clean Agent Fire Extinguishing Systems (California)

#### Federal Codes and Standards:

Americans with Disabilities Act (ADA), Title II or Title III

Title II: Uniform Federal Accessibility Standards (UFAS) or ADA Standards for Accessible Design (Appendix A of 28 CFR, Part 36).

Title III: ADA Standards for Accessible Design (Appendix A of 28 CFR, Part 36).

#### MEP Component Anchorage Note

All mechanical, plumbing, and electrical components shall be anchored to the structure in accordance with the requirements of the DSA approved construction documents. Where no detail is indicated, components shall be anchored or braced to meet the force and displacement requirements of ASCE 7-10 Section 1616A.1.18 through 1616A.1.26 and ASCE 7-10 Chapter 13, 26 and 27.

1. All permanent equipment and components.
2. Temporary or movable equipment that is permanently attached to the structure for utility services such as electricity, gas or water.
3. Movable equipment which is stationed in one place for more than 30 days. Pounds are required to be anchored with temporary attachment devices.

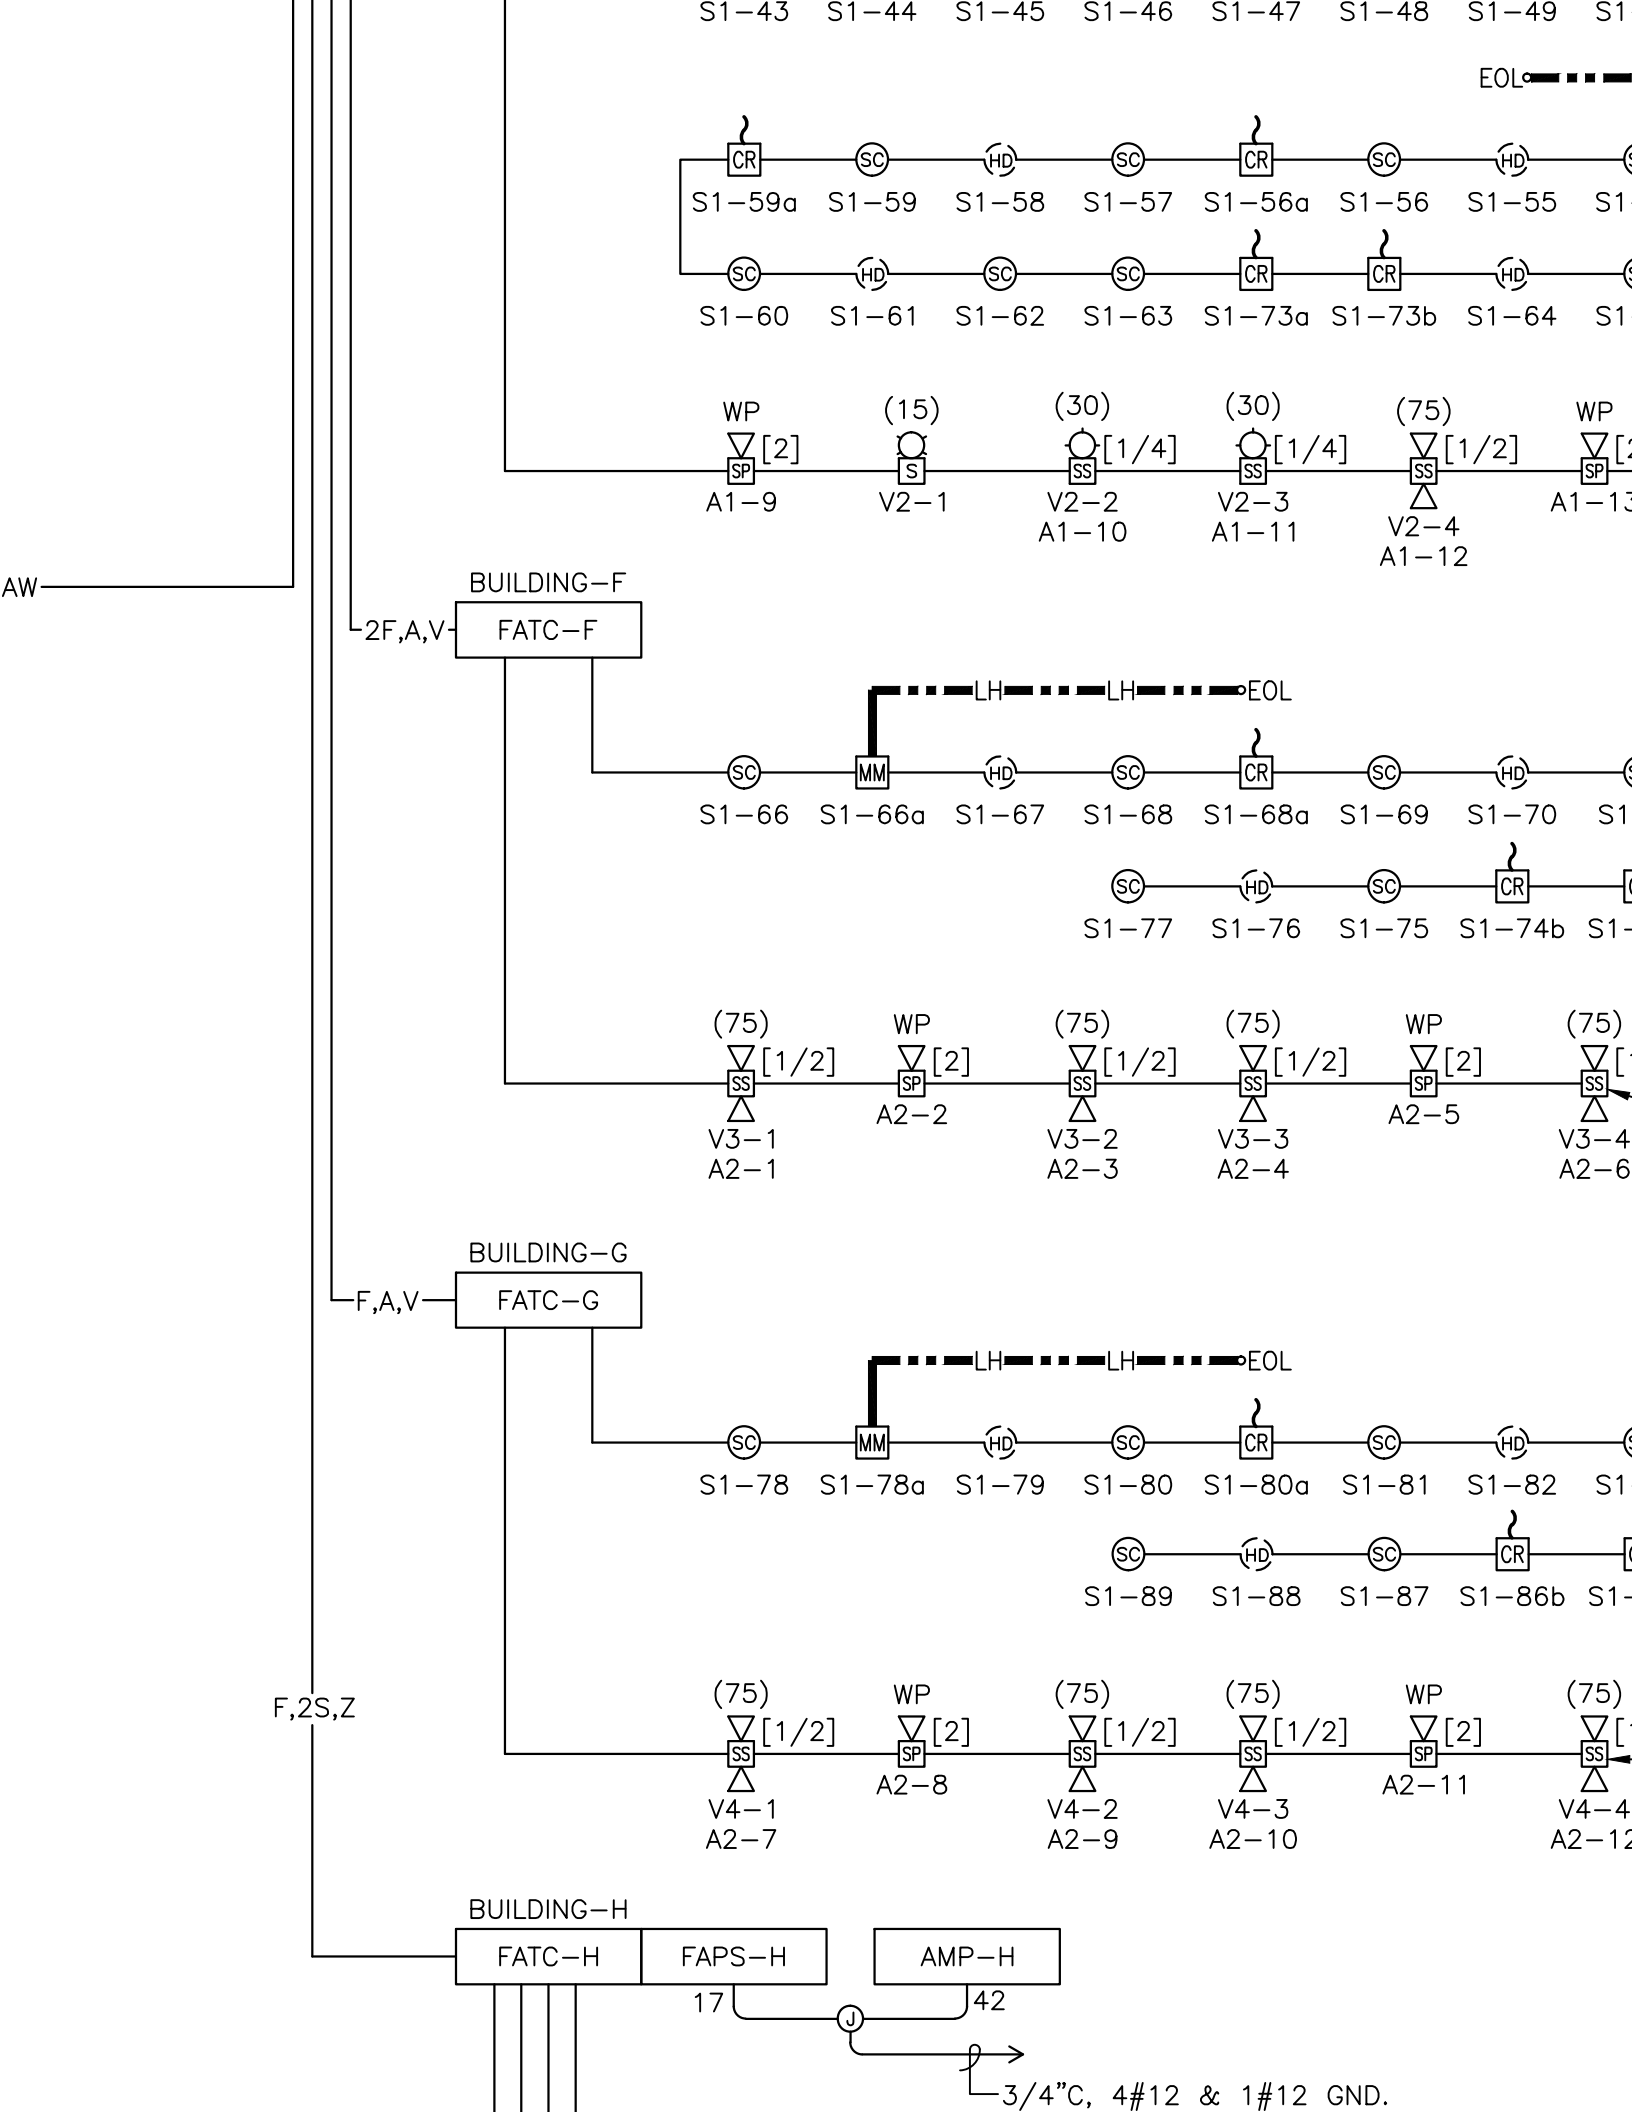

The following mechanical and electrical components shall be positively anchored and not be detailed on the plans. These components shall be anchored in accordance with the requirements of the DSA approved construction documents.

# 6820EVS

Addendum-001 | 03-118779  
AS REVISED

## Intelligent Fire Alarm Control Panel with Emergency Voice System

### The 6820EVS panel and accessories provide features to meet the requirements for Mass Notification Systems as described in UL 2572.

The 6820EVS is an intelligent addressable Fire Alarm Control Panel combined with an Emergency Voice System (EVS) and are direct replacements for the 5820XL-EVS FACP. When the EVS features are enabled, they are integrated with the fire alarm and voice evacuation functions of the control panel.

The emergency voice system operations include an onboard supervised microphone. All-call and non-active call buttons can quickly select all active or non-active output groups. The system also allows for emergency messages over fire.

The 6820EVS FACP has one built-in signaling line circuit (SLC), which can support 159 SK detectors and 159 SK modules, or 127 SD protocol devices. Additional SLC loops can be added for a maximum of 1110 (SK) or 635 (SD) points per panel.

The built-in digital alarm communicator/transmitter (DACT) is dual technology, IP and POTS. The POTS transmits system status (alarms, troubles, AC loss, etc.) to a Central Station via the public switched telephone network. The IP communicator's internet monitoring capability sends alarm signals over the Internet saving the monthly cost of two dedicated business telephone lines. Although not required, the secondary telephone line may be retained providing backup communication over the public switched telephone line. Optional cellular reporting is available.

The 6820EVS has six onboard Flexput® circuits that can be configured as notification outputs or auxiliary power. The 6820EVS also has a form-C trouble relay, and two programmable form-C relays, along with powerful features such as drift compensation, pre-trouble maintenance alert, a built-in sensor test to comply with NFPA 72 calibration testing requirements, and a calibration trouble alert.

A common communications and annunciation link allows up to 17 panels to be connected via copper or fiber optic cable. A designated panel is configured as the communicator for all panels in the link for convenient single-point communications.

## FEATURES AND BENEFITS

- Single enclosure for both fire and emergency voice components
- Ability to select EVS messages as priority over fire
- 15 Recordable one-minute messages that can be mapped to eight EVS buttons
- Capable of producing 520 Hz tones to meet NFPA 72 requirements
- Support for up to 4 LOCs and 8 addressable amplifiers
- Expandable SLC loops to 1110 (SK) or 635 (SD) point capacity
- Six Flexput circuits for NAC outputs or auxiliary power
- Selectable strobe synchronization for Amseco®, System Sensor, Wheelock®, and Gentex® devices
- Built-in DACT with IP and optional cellular reporting
- Built-in USB interface for quick and easy programming
- JumpStart® auto programming reduces installation time
- 999 software zones & 999 output groups for flexible design options
- 23 preset notification cadence patterns (including ANSI® 3.41)
- Allows up to 24 SBUS devices
- Four programmable function keys
- Two programmable relays and one fixed trouble relay
- Compatible with SWIFT® wireless devices
- Convenient field-upgradeable firmware
- Network support for up to 17 sites
- Network card allows copper network connection with a multi-mode or single-mode fiber connection
- Real-time clock/calendar with automatic daylight savings control
- History file with 1,000 event capacity

## **USER INTERFACE**

### **LED INDICATORS**

- General Alarm (Red)
- Supervisory (Yellow)
- System Trouble (Yellow)
- System Silenced (Yellow)
- System Power (Green)

### **KEYPAD**

- 12-key numeric pad
- Acknowledge
- Alarm Silence
- System Reset
- Drill
- F1-F4 Programmable Function Keys

## **PROGRAMMING**

The 6820EVS system offers several options to simplify and expedite programming. JumpStart® auto programming minimizes programming required to start a new system. The built-in keypad, or the remote annunciators give on-site access to current system programming. System programming can also be accomplished using the Windows®-based Honeywell Fire Software Suite (HFSS).

## **ORDERING INFORMATION**

6820EVS: Addressable fire alarm control panel, red

### **COMPATIBLE EVS EQUIPMENT**

EVS-50W: 50 Watt amplifier

EVS-125W: 125 Watt amplifier

EVS-100W: 50/100 Watt amplifier

EVS-100WBU: External backup amplifier

EVS-INT50W: 50 /Watt internal amplifier

EVS-CE4: Provides 4 additional audio circuits

EVS-RVM: Remote voice module

EVS-SW24: 24 switch expander

EVS-VCM: Network voice control module

EVS-LOC: Local operator console

### **COMPATIBLE SBUS DEVICES**

6860: 4x40 LCD remote fire annunciator with four programmable buttons, red

5860: 4x20 LCD remote fire annunciator, gray

5860R: 4x20 LCD remote fire annunciator, red

6855: 4x20 LCD remote fire annunciator, red

5865-3: LED annunciators- display up to 30 LEDs (15 red/15 yellow)

5865-4: LED annunciators- display up to 30 LEDs (15 red/15 yellow). Key switches for silence and reset, and a system trouble LED

5880: LED I/O module with 40 programmable LED outputs and eight supervised dry contact inputs

5883: Relay interface. Provides 10 Form C relays

5824: Serial/Parallel printer interface module for printer connection

### **SK COMPATIBLE ADDRESSABLE DEVICES**

**Note:** SK and SD devices cannot be mixed in the same fire alarm system.

SK-ACCLIMATE: Multi criteria photoelectric smoke detector with thermal 135°F fixed temperature

SK-BEAM: Reflected beam smoke detector without test feature

SK-BEAM-T: Reflected beam smoke detector with test feature

OSI-RI-SK: Reflected beam smoke detector, SK protocol

SK-CONTROL: Supervised control module

SK-CONTROL-6: Six circuit supervised control module

SK-DUCT: Photoelectric duct smoke detector with extended air speed range

SK-FIRE-CO: Four criteria fire and carbon monoxide detector

SK-FIRE-CO-W: Four criteria fire and carbon monoxide detector, white

SK-HEAT: Fixed thermal detector (135°F)

SK-HEAT-W: Fixed thermal detector (135°F), white

SK-HEAT-ROR: Fixed rate of rise detector

SK-HEAT-HT: Fixed high temperature heat detector (190°F)

SK-HEAT-HT-W: Fixed high temperature heat detector (190°F), white

SK-HEAT-ROR-W: Fixed rate of rise detector, white

SK-ISO: Fault isolator module

SK-MINIMON: Mini monitor module

SK-MONITOR: Monitor module

SK-MONITOR-2: Dual input monitor module

SK-MON-10: 10- input monitor module

SK-PHOTO: Photoelectric smoke detector

SK-PHOTO-W: Photoelectric smoke detector, white

SK-PHOTO-R: Photoelectric detector with remote test capability

SK-PHOTO-R-W: Photoelectric det. with remote test capability, white

SK-PHOTO-T: Photoelectric smoke detector with fixed heat (135°F)

SK-PHOTO-T-W: Photoelectric smoke detector with fixed thermal heat (135°F), white

SK-PTIR-W: Multi criteria photoelectric smoke detector with thermal 135°F fixed temperature, white

SK-PULL-SA Addressable single action pull station

SK-PULL-DA: Addressable dual action pull station

SK-RELAY: Addressable relay module

SK-RELAY-6: Addressable Six relay control module

SK-RELAYMON-2: Addressable Dual relay/monitor module

SK-ZONE: Addressable zone interface module

SK-ZONE-6: Six zone interface module

### **SK BASES**

B210LP: 6" mounting base

B501: 4" Flangeless mounting base

B200S: Intelligent sounder base

B200S-LF: Low-frequency intelligent sounder base

B224RB: Relay base

B224BI: Isolator base

## **SD COMPATIBLE ADDRESSABLE DEVICES**

**Note:** SK and SD devices cannot be mixed in the same fire alarm system.

SD505-6AB: Addressable 6" base

SD505-6IB: Addressable 6" short circuit isolator base

SD505-6RB: Addressable 6" relay base

SD505-6SB: Addressable 6" sounder base

SD500-AIM: Addressable input module (switch input)

SD500-ANM: Addressable notification module

SD500-ARM: Addressable relay module

SD505-DTS-K: Remote test switch/LED indicator for the SD505-DUCTR

SD505-DUCT: Addressable Duct Smoke Detector

SD505-DUCTR: Addressable Duct Detector housing with relay base

SD505-HEAT: Absolute temperature heat detector. Trip point range from 135°F–150°F (0°C–37°C)

SD500-LIM: Addressable Line isolator module

SD500-MIM: Addressable Mini input monitor module (switch input)

SD505-PHOTO: Photoelectric smoke detector

SD500-PS/-PSDA: Addressable Single or dual action pull station

SD500-SDM: Addressable smoke detector module

## **SWIFT WIRELESS DEVICES**

**Note:** SWIFT is only compatible with System Sensor (SK) devices. It is not compatible with Hochiki (SD) devices.

WSK-WGI: Wireless gateway

WSK-PHOTO: Wireless photoelectric smoke detector with B501W base

WSK-PHOTO-T: Wireless photoelectric smoke detector with fixed thermal detection (135°F) and B501W base

W-SYNC: Wireless sync module

WSK-HEAT: Wireless, fixed heat detector (135°F) with B501W base

WSK-HEAT-ROR: Wireless rate-of-rise heat detector and B501W base

WSK-MONITOR: Wireless monitor module

WSK-RELAY: Wireless relay module

WSK-PULL-DA: Wireless pull station

WAV-CRL, WAV-CWL: Wireless AV bases

W-USB: Wireless USB radio/antenna dongle that plugs into the USB port of a PC running SWIFT Tools

SWIFT Tools: Programming and diagnostic utility for the wireless gateway and devices. Available for download from [www.farenhyt.com](http://www.farenhyt.com)

## **SYSTEM EXPANDERS**

6815: SLC Expander for IDP or SK devices

5815XL: SLC expander for SD devices

RPS-1000: 6A power supply with 6 Flexput circuits & 2 Form C relays

5496: 6 amp NAC power expander with 4 power-limited output ckt

## **OPTIONAL COMMUNICATORS**

CELL-CAB-SK: Cellular communicator, metal enclosure w/lock & key

CELL-MOD: Cellular communicator, plastic enclosure

IPGSM-4G: Dual path fire alarm communicator, cellular and/or IP (primary or backup, selectable)

SK-IP-2: Remote reporting via the Internet. Requires a VisorALARM® receiver at the central station

## **MISCELLANEOUS ACCESSORIES**

SK-NIC: Network Interface Card. Provides a common communications link for the IFP-300

SK-NIC-KIT: Installation Accessory Kit

SK-FML: Fiber-Optic Multi Mode, transmitter and receiver

SK-FSL: Fiber-Optic Single Mode

RBB: Remote battery box accessory cabinet

SK-SCK: Seismic compliance kit used to fasten batteries to the fire panel

## **SOFTWARE SOLUTIONS**

SKST: Silent Knight Selection Tool provides the installer or design architect with a Windows®-based software system configuration tool to create a detailed bill of material (BOM) and battery calculations

HFSS: Honeywell Fire Software Suite provides remote and local panel programming, detector status, event history and additional data. Databases can be uploaded/downloaded via the panel's USB port using a flash drive. Requires a PC running Microsoft® Windows®.

# 6820EVS TECHNICAL SPECIFICATIONS

Addendum-001 | 03-118779  
AS REVISED

## SYSTEM CAPACITY

**Intelligent Signaling Line Circuits:** 1 (expandable)

**Addressable device capacity:** 1110 (SK) or 635 (SD)

**Programmable software zones:** 999

**Output circuits:** 6 (expandable)

**SBUS devices:** 24 (16 annunciators, 8 LED modules)

**LOC units:** 4

**Addressable amplifiers (total watts):** 8 (1000)

## ELECTRICAL

**AC Power:** 120VAC, 60Hz, 2.7A

**Standby Current:** 190 mA

**Alarm Current:** 250 mA

**Flexput Circuits:** Terminal block provides connections for (six Class B or three Class A) NACs or auxiliary power. Power-limited, supervised circuitry. Maximum current per circuit: 3 A. Cannot exceed 6A total for all circuits. End-of-line resistor: 4.7k ohm, ½ watt for Class B NAC

**Communication Loop:** Supervised and power-limited, Class A or Class B, 32VDC, 150mA

**Two Programmable Relays and One Fixed Trouble Relay:** Contact rating: 2.5 A @ 27.4 VDC (resistive), Form C

**Battery:** Cabinet holds maximum of two 18 AH batteries

**Battery Charger Capacity:** 7–35 AH

## PHYSICAL

**Dimensions:** 21.6" W x 28.1" H x 5.1" D (54.9cm W x 71.4cm H x 13.0cm D)

**Weight:** 50 lbs. (22.7 kg.)

**Color:** Red

## TEMPERATURE AND HUMIDITY RANGES

This system meets NFPA requirements for operation at 0 – 49°C (32– 120°F) and at a relative humidity 93% ± 2% RH (non-condensing) at 32°C ± 2°C (90°F ± 3°F). However, the useful life of the system's standby batteries and the electronic components may be adversely affected by extreme temperature ranges and humidity. Therefore, it is recommended that this system and its peripherals be installed in an environment with a normal room temperature of 15 – 27°C/60 – 80°F.

## NFPA STANDARDS

The 6820 complies with the following NFPA 72 Fire Alarms Systems requirements: NFPA 13, NFPA 15, NFPA 16, NFPA 70, NFPA 72

Central station; remote Signaling; Local Protective Signaling Systems; Auxiliary Protected Premises Unit; Water Deluge releasing service. Suitable for automatic, manual, waterflow, sprinkler supervisory (DACT non-coded) signaling services

## AGENCY LISTINGS AND APPROVALS

The listings and approvals below apply to the basic 6820 control panel. In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

**UL Listed:** S2766

**CSFM:** 7165-0559:0500

## Honeywell Silent Knight EVS-LOC

### Local Operator Console

The EVS-LOC local operator console is a powerful addition to any emergency voice system for mass notification purposes. The console is a combination supervised remote microphone and annunciator which is compatible with the EVS-Series Emergency Voice System and meets UL requirements for a local operator console (LOC).

The EVS-LOC provides an interface to the 6820EVS Emergency Voice System. It has a supervised on-board microphone for live communications and its annunciator is capable of performing complete operation of the fire alarm system, including silencing and resetting.

It has a large 4x40 LCD backlit screen with up to 160 available characters, providing ample space for messaging. The EVS-LOC also has four programmable buttons which can be used to minimize time spent executing complex or routine tasks.

The console's emergency communication system operations includes an on-board supervised microphone, and all call and non-active call buttons that can quickly select all active or all non-active output groups. The system also lets you select an EVS message as a priority over fire.

The EVS-CE4 is a useful addition to an EVS-LOC application. It adds four audio circuits to the EVS-50W, EVS-100W or EVS-125W, mappable to 32 buttons controlling selected output groups. It is very useful for extended coverage and requires no additional space as it mounts inside the amplifier cabinet.

The 5880 LED / IO module can also be used with an EVS-LOC application. The module provides an effective means to customize your remote

**EVS-LOC**

annunciation, providing 40 programmable LED outputs and eight supervised dry contact inputs. You can use up to eight 5880 modules on one EVS-LOC control panel for maximum flexibility. Its compact size enables it to be mounted inside the EVS-LOC, or in an accessory cabinet.

About Silent Knight's emergency voice system: The 6820EVS is a fire and emergency voice communication system conveniently integrated and housed in one panel, and meets the requirements for mass notification as described in UL 2572.

#### COMPATIBILITY

6820EVS: Addressable fire alarm control panel with an emergency mass notification system, up to 1,110 addressable points, a large 160 character 4 x 40 display, and four programmable buttons that can be programmed for routine or complex tasks

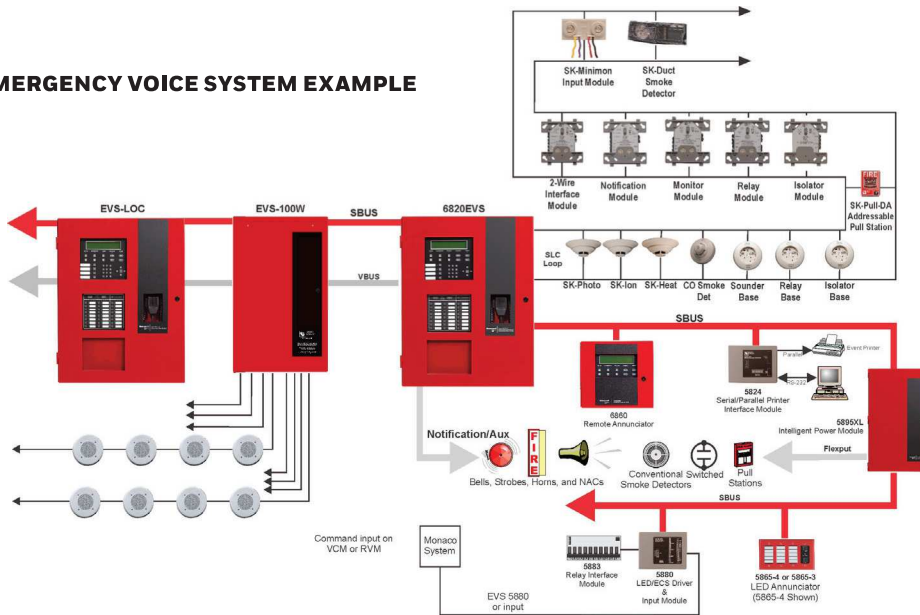

**Note:** It can also be used with existing 5820XL-EVS installations

### FEATURES & BENEFITS

- Provides additional communications and control options that are also available in the 6820EVS primary panel
- Useful for extending system access to additional areas of a building or mass notification network
- Makes access to the communication system easier when immediate and timely communications are essential
- The optional VIP-TR trim ring is useful for creating a visual appealing interface between the panel and mounting wall
- Up to four EVS-LOCs can be added to a compatible emergency voice system for a total of five command units. This provides additional control options which are critical during emergency events when the 6820EVS panel is not within easy reach.
- For added flexibility, it can also accept programmable trigger inputs from external source, such as a Monaco® system, to either the RVM or Silent Knight's 5880. Up to eight inputs are available on the 5880 module.
- Up to 32 mappable speaker circuits can be connected on the EVS-LOC using a combination of the EVS-50W, EVS-100W or EVS-125W amplifiers. This is useful for extended reach during times when urgent emergency communication is required.

# 5496

## Intelligent Power Module

The 5496 intelligent power module is the most cost-effective power supply available today. It delivers 6 amps of notification appliance circuit power and built-in synchronization for appliances from System Sensor®, Gentex®, AMSECO, and Wheelock®. The 5496's advanced microprocessor design is years ahead of the competition. Its switch mode power supply design is up to 50% more efficient than competitive linear mode power supplies.

The 5496 is a 6 amp notification power expander that provides its own AC power connection, battery charging circuit, and backup battery for use with the Honeywell Silent Knight series fire alarm control panels (FACPs). The 5496 is the cost-effective solution for powering notification appliances required by the Americans with Disabilities Act (ADA). The 5496 has built-in ANSI cadence pattern. The output circuits can be programmed as notification appliance circuits, or as auxiliary power (configurable for constant, resettable, or door holder power).

5496

### Compatibility

The 5496 is compatible with the following Honeywell Silent Knight FACPs:

- 6820 / 6820EVS
- 5820XL / 5820XL-EVS
- 6808
- 6700
- 5808
- 5700

## **EVS-50W**

### Intelligent 50 Watt Amplifier

The EVS-50W is an intelligent 50 watt amplifier for use with the 5820XL-EVS or 6820EVS. The EVS-50W is used to amplify the audio message for distribution throughout the facility. Since it is designed as a self-contained distributed amplifier it can be conveniently located near the area of protection to reduce wiring demands.

Each EVS-50W is capable of producing 50-watts of audio power. Up to four EVS-50W's can be used on the voice evacuation system.

The EVS-50W has its own power supply with battery backup and four speaker circuits which can be expanded to eight speaker circuits with the optional EVS-CE4. The EVS-50W is fully supervised by the main panel for trouble conditions.

#### **INSTALLATION**

The EVS-50W can be surface or flush mounted.

#### **COMPATIBILITY**

The EVS-50W is compatible with the following Honeywell Silent Knight Series FACPs:

- 6820EVS: Addressable fire alarm control panel with an emergency voice system, up to 1,110 addressable points, and four programmable buttons that can be programmed for routine or complex tasks
- 5820XL-EVS: Addressable fire alarm control panel with an emergency voice systems and up to 792 addressable points

**EVS-50W**

## FEATURES & BENEFITS

- Integrates directly with Silent Knight Series 6000 panels. Installation is easy as there is no need for special programming or a separate dialer capture module
- Battery backup provided by the fire alarm control panel for enhance efficiencies and cost savings
- Communicators provide dual path cellular and IP reporting capability when combined with 6000 series panels
- UL 864 and NFPA 72 code compliant for sole, primary, or backup communications
- Accounts can be easily managed through on-line management tools
- Remote mount up to 6000 feet to ensure best reception
- Includes Quality of Service (QOS) diagnostics via AlarmNet which conveys vital communicator information, including when messages are received, signal strength, and message path used
- Programmable supervision time from 1 to 60 minutes
- Provides full data reporting using Contact ID format

AS REVISED

Page 1 of 1

**LISTING No.** 7165-0559:0172

**CATEGORY:** 7165 -- FIRE ALARM CONTROL UNIT (COMMERCIAL)

**LISTEE:** SILENT KNIGHT SECURITY One Fire-Lite Place, Northford, CT 06472-1653  
Contact: Megan Sisson (203) 484-6544 Fax (203) 484-7309  
Email: [megan.sisson@honeywell.com](mailto:megan.sisson@honeywell.com)

**DESIGN:** Model 5820XL-EVS Fire Alarm Control Unit. Automatic, manual, local, remote station (PPU), central station (PPU), releasing (water deluge only) and mass notification services. Refer to listee's data sheet for additional detailed product description and operational considerations.

System components:

5820XL-EVS; Control unit  
5820XL-EVSCCB; Enclosure  
EVS-RCU; Remote command unit  
EVS-50W, EVS-125W; Amplifiers  
EVS-RVM; Remote voice module  
EVS-VCM; Voice control module  
EVS-SW24; Switch expander  
EVS-CE4; Speaker expander module  
EVS-100W  
EVS-WBU

**RATING:** 120V, 60HZ

**INSTALLATION:** In accordance with listee's printed installation instructions, applicable codes and ordinances and in a manner acceptable to the authority having jurisdiction.

**MARKING:** Listee's name, model number, electrical rating, and UL label.

**APPROVAL:** Listed as commercial fire alarm control unit for use with separately listed initiating and indicating devices and for mass notification. Refer to listee's Installation Instruction Manual for details.

**NOTE:** For Fire Alarm Verification feature (delay of fire alarm signal), the maximum Retard/Reset/Restart period shall not exceed 30 seconds

09-25-14 jp

This listing is based upon technical data submitted by the applicant. CSFM Fire Engineering staff has reviewed the test results and/or other data but does not make an independent verification of any claims. This listing is not an endorsement or recommendation of the item listed. This listing should not be used to verify correct operational requirements or installation criteria. Refer to listee's data sheet, installation instructions and/or other

Date Issued: **July 01, 2020**

Listing Expires **June 30, 2021**

AS REVISED

# SK-PULL-SA / SK-PULL-DA

## Intelligent Pull Stations

The SK-PULL-SA is a single action pull station requiring only one motion to activate the station. The SK-PULL-DA is a dual action pull station requiring two motions to activate the station. The SK-PULL-SA and SK-PULL-DA are for use with Honeywell Silent Knight Series fire control panel (FACP).

Extremely easy to operate, the SK-PULL-DA and SK-PULL-SA provide a fast and practical means of manually initiating a fire alarm signal. The FACP recognizes each manual pull station by its specific address saving precious seconds in determining the location of an alarm.

### INSTALLATION

The SK-PULL-SA and SK-PULL-DA can be surface mounted to an SB-I/O surface back box or semi-flush mounted on a standard single-gang with a minimum depth of 2.13"(5.40 cm) or double gang or 4" (10.61 cm) square electrical box. You can also use the optional (System Sensor® PN BG-TR) trim ring if the station is being semi-flush mounted.

**SK-PULL-SA**

**SK-PULL-DA**

## FEATURES & BENEFITS

- Installer can open station without causing an alarm condition
- Dual-color LED is visible through handle of station blinks green to indicate normal operation and remains steady red in an alarm condition
- Key operated test and reset lock using lock plate actuator
- Key matches compatible FACP locks
- Meets ADA requirement for 5 lbs maximum pull force to active
- Meets the Americans with Disabilities Act Accessibility Guidelines (ADAAG) controls and operating mechanisms guidelines (Section 4.1.3[13])
- Shell, door, and handle molded from durable LEXAN®
- Reliable analog communications for trouble-free operation
- Braille text on station handle
- Rotary address switches for fast installation
- Handle latches in down position and the word Activated appears, clearly indicating the station has been pulled
- UL Listed, including UL 38, Standard of Manually Actuated Signaling System
- CSFM Listed
- MEA Listed

# SK-PULL-SA / SK-PULL-DA Technical Specifications

## Addendum-001 | 03-118779 AS REVISED

### PHYSICAL

**Dimensions:** 5.5" H x 4" W x 1.45" D (14 x 10.2 x 3.7cm)

**Housing Material:** LEXAN polycarbonate resin

#### Bi-Colored LED:

**Blinking Green:** Normal

**Steady Red:** Alarm

**Switch:** Single pole, single throw (SPST) normally open (N/O) switch which closes upon activation of the pull station

### ELECTRICAL

**Operating Voltage:** 15 – 32VDC

**SLC Standby and Alarm Current:** 350µA

**Wire Gauge:** Up to 12AWG (3.1 mm<sup>2</sup>)

### ENVIRONMENTAL

**Operating Temperature:** 32°F – 120°F (0°C – 49°C)

**Humidity:** 10% – 93% non-condensing

### ORDERING INFORMATION

**SK-Pull-SA:** Single Action Pull Station

**SK-Pull-DA:** Dual Action Pull Station

### ACCESSORIES

**BG-TR:** Optional trim ring.

**SB-I/O:** Surface backbox, indoor/outdoor.

\* Unless otherwise noted, specifications apply to SK-Pull-SA and SK-Pull-DA

### COMPATIBILITY

The SK-PULL-SA AND SK-PULL-DA are compatible with the following Honeywell Silent Knight fire alarm control panels:

**6820:** Addressable fire alarm control panel

**6820EVS:** Addressable fire alarm control panel with an emergency voice system.

**6808:** Addressable fire alarm control panel

**6700:** Addressable fire alarm control panel

**5700:** Addressable fire alarm control panel

**5808:** Addressable fire alarm control panel

**5820XL:** Addressable fire alarm control panel

**5820XL-EVS:** Addressable fire alarm control panel with an emergency voice system

# SK-PHOTO-W SERIES

Addressable Photoelectric Smoke Detectors

Addendum-001 | 03-118779  
AS REVISED

The Silent Knight® SK-PHOTO-W Series feature a modern design and expanded color options support a variety of contemporary aesthetic demands. In addition, each detector is constructed for exceptional installation and maintenance efficiency.

The SK-PHOTO-W Series intelligent plug-in smoke detectors are designed for both performance and aesthetics, and are direct replacements for the SK-PHOTO Series detectors. A new modern, sleek, contemporary design and enhanced optical sensing chamber is engineered to sense smoke produced by a wide range of combustion sources in accordance with more stringent code standards. The SK-PHOTO-W Series detector sensitivity can be programmed in the control panel software. Sensitivity is continuously monitored and reported to the panel. Point ID capability allows each detector's address to be set with rotary, decimal address switches, providing exact detector location for selective maintenance when chamber contamination reaches an unacceptable level. Dual electronic thermistors add 135°F (57°C) fixed temperature thermal sensing on the SK-PHOTO-T-W. The SK-PHOTO-R-W is a remote test capable detector for use with DNR Series duct detector housings.

## FEATURES AND BENEFITS

- Designed to meet UL 1268 7th Edition
- Sleek and stylish contemporary design
- Stable communication technique with noise immunity
- Addressable by device
- Rotary, decimal addressing (Refer to the Silent Knight panel manuals for device capacity)
- Two-wire SLC connection
- LEDs blink every time the unit is polled
- 360°-field viewing angle of the visual alarm indicators (two bi-color LEDs); LEDs blink green in Normal condition and turn on steady red in Alarm
- Integral communications and built-in device-type identification
- Remote test feature from the panel
- Built-in functional test switch activated by external magnet
- Walk test with address display (an address of 121 will blink the detector LED 12-(pause)-1)
- Low standby current
- Built-in tamper-resistant feature
- Designed for direct-surface or electrical-box mounting
- Sealed against back pressure
- Plugs into separate base for ease of installation and maintenance
- Expanded color options
- SEMS screws for wiring of the separate base
- Optional remote, single-gang LED accessory
- Optional sounder, relay, and isolator bases

## **INSTALLATION**

The SK-PHOTO-W Series plug-in intelligent thermal detectors use a separate base to simplify installation, service, and maintenance. Installation instructions are shipped with each detector.

Mount base (all base types) on an electrical backbox which is at least 1.5" (3.81 cm) deep. For a chart of compatible junction boxes, see SK-61045.

**Note:** Because of the inherent supervision provided by the SLC loop, end-of-line resistors are not required. Wiring "T-taps" or branches are permitted for Style 4 (Class "B") wiring.

**Note:** When using relay or sounder bases, consult the SK-ISO installation sheet I56-3627 for device limitations between isolator modules and isolator bases.

## **OPERATION**

Each SK-PHOTO-W Series detector uses one of the panel's addresses (total limit is panel dependent) on the Signaling Line Circuit (SLC). It responds to regular polls from the control panel and reports its type and the status. If it receives a test command from the panel (or a local magnet test), it stimulates its electronics and reports an alarm. It blinks its LEDs when polled and turns the LEDs on when commanded by the panel. The SK-PHOTO-W Series offers features and performance that represent the latest in smoke detector technology.

## **PRODUCT LINE INFORMATION**

**Note:** "-IV" suffix indicates ivory color.

**SK-PHOTO-W:** White, low-profile photoelectric sensor

**SK-PHOTO-T-W:** White, same as SK-PHOTO-W but includes a built-in 135°F (57°C) fixed-temperature thermal device

**SK-PHOTO-R-W:** White, low-profile intelligent photoelectric sensor, remote test capable, for use with DNR/DNRW

**B300-6:** White, standard flanged low-profile mounting base

**B300-6-BP:** Bulk pack of B300-6, package contains 10

**B300-6-IV:** Ivory, standard flanged low-profile mounting base

**B501-WHITE:** White, standard European flangeless mounting base

**B501-BL:** Black, standard European flangeless mounting base

**B501-IV:** Ivory, standard European flangeless mounting base

**B501-WHITE-BP:** Bulk pack of B501-WHITE, contains 10

**B200S-WH:** White, Intelligent, programmable sounder base

**B200S-IV:** Ivory, Intelligent, programmable sounder base

**B200SR-WH:** White, Intelligent sounder base for retrofit applications

**B200SR-IV:** Ivory, Intelligent sounder base for retrofit applications

**B200S-LF-WH:** White, Low Frequency Intelligent, programmable sounder base

**B200S-LF-IV:** Ivory, Low Frequency Intelligent, programmable sounder base

**B200SR-LF-WH:** White, Low Frequency Intelligent sounder base for retrofit applications

**B200SR-LF-IV:** Ivory, Low Frequency Intelligent sounder base for retrofit applications

**B224RB-WH:** White, plug-in System Sensor® relay base

**B224RB-IV:** Ivory, plug-in System Sensor relay base

**B224BI-WH:** White, plug-in System Sensor isolator detector base

**B224BI-IV:** Ivory, plug-in System Sensor isolator detector base

## **ACCESSORIES**

**TR300:** White, replacement flange for B210LP or B300-6 bases

**TR300-IV:** Ivory, replacement flange for B210LP or B300-6 bases

**RA100Z(A):** Remote 3 – 32 VDC LED annunciator, mounts to a U.S. single-gang electrical box, for use with B501 and B300-6 bases only

**M02-04-00:** Test magnet

**M02-09-00:** Test magnet with telescoping handle

**CK300:** White, detector color kit, pack of 10

**CK300-IV:** Ivory, detector color kit, pack of 10

**CK300-BL:** Black, detector color kit, pack of 10

# SK-PHOTO-W SERIES TECHNICAL SPECIFICATIONS

Addendum-001 | 03-118779  
AS REVISED

## PHYSICAL/ENVIRONMENTAL

### Sensitivity:

- UL Applications: 0.5% to 4.0% per foot obscuration.
- ULC Applications: 0.5% to 3.5% per foot obscuration

**Size:** 2.0" (5.3 cm) high; base determines diameter

- **B300-6:** 6.1" (15.6 cm) diameter
- **B501:** 4" (10.2 cm) diameter

For a complete list of detector bases, see SK-61045.

**Shipping weight:** 3.4 oz. (95 g)

### Operating temperature range:

- SK-PHOTO-W: 32°F to 122°F (0°C to 50°C)
- SK-PHOTO-T-W: 32°F to 100°F (0°C to 38°C)
- SK-PHOTO-R-W installed in a DNR/DNRW: -4°F to 158°F (-20°C to 70°C)

**UL/ULC Listed Velocity Range:** 0-4000 ft/min. (1219.2 m/min.), suitable for installation in ducts

**Relative humidity:** 10% – 93% non-condensing

**Thermal ratings:** fixed-temperature set point 135°F (57°C), rate-of-rise detection 15°F (8.3°C) per minute, high temperature heat 190°F (88°C)

## ELECTRICAL SPECIFICATIONS

**Voltage range:** 15 – 32 volts DC peak

**Standby current (max. avg.):** 200µA @ 24 VDC (one communication every 5 seconds with LED enabled)

**Max current:** 4.5 mA @ 24 VDC ("ON")

## DETECTOR SPACING AND APPLICATIONS

Silent Knight recommends spacing detectors in compliance with NFPA 72. In low airflow applications with smooth ceiling, space detectors 30 feet (9.1m). For specific information regarding detector spacing, placement, and special applications refer to NFPA 72. A *System Smoke Detector Application Guide*, document A05-1003, is available at [www.systemsensor.com](http://www.systemsensor.com).

## AGENCY LISTINGS AND APPROVALS

These listings and approvals apply to the modules specified in this document. In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. *Consult factory for latest listing status.*

Addendum-001 | 03-118779  
AS REVISED

Page 1 of 1

**LISTING No.** 7272-0559:0512

**CATEGORY:** 7272 -- SMOKE DETECTOR-SYSTEM TYPE-PHOTOELECTRIC

**LISTEE:** SILENT KNIGHT SECURITY One Fire-Lite Place, Northford, CT 06472-1653  
Contact: Megan Sisson (203) 484-6544 Fax (203) 484-7309  
Email: megan.sisson@honeywell.com

**DESIGN:** Models IDP-PHOTO-W, IDP-PHOTO-R-W, IDP-PHOTO-T-W, SK-PHOTO-W, SK-PHOTO-R-W, and SK-PHOTO-T-W analog addressable, photoelectric smoke detectors for open area and duct installations. Models IDP-PHOTO-T-W and SK-PHOTO-T-W have complementary heat detectors. All models are similar except for population/depopulation of components on the Printed Wiring Board for the intended features. All above models may be followed by two digit Suffix indicating the color of the detector enclosure: no suffix for white, -IV for ivory, -BL for black. Refer to listee's Installation and Maintenance Instruction for additional detailed product description and operational considerations.

**RATING:** 24 VDC.

**INSTALLATION:** In accordance with listee's printed installation instructions, applicable codes and ordinances and in a manner acceptable to the authority having jurisdiction.

**MARKING:** Listee's name, model number, electrical rating, and UL label.

**APPROVAL:** Listed as photoelectric smoke detectors. Detectors are for use with separately listed System Sensor base Models \*B224BI and B224RB (CSFM Listing 7300-1653:0126), \*B501, \*B210LP (CSFM Listing 7300-1653:0109), B200S and B200SR (CSFM Listing 7300-1653:0213), B200S-LF and B200SR-LF (CSFM Listing 7300-1653:0238), B300-6 and B300-6-IS bases (CSFM Listing 7300-1653:0109), System Sensor duct detector housings Models DNR and DNRW (CSFM listing 3240-1653:0209), and separately listed compatible fire alarm control units. Refer to manufacturer's Installation Manual for details. \*All models comply with the applicable requirements in ANSI/UL 268, Smoke Detectors for Fire Alarm Systems, 7th Edition, January 11, 2016.

**NOTE:** The photoelectric type detectors are generally more effective at detecting slow, smoldering fires that smolder for hours before bursting into flame. Sources of these fire may include cigarettes burning in the couch or bedding. The ionization type detectors are generally more effective at detecting fast, flaming fires that consume combustible materials rapidly and spread quickly. Sources of these fires include paper burning in a waste container or a grease fire in the kitchen.

# SK-HEAT-W SERIES

## Addressable Heat Detectors

Addendum-001 | 03-118779  
AS REVISED

The Silent Knight® SK-HEAT-W Series heat detectors are designed for both performance and aesthetics. A new modern, sleek, contemporary design and advanced thermal technologies make the SK-HEAT-W Series ideal for both system operation and building design.

The series includes a 135°F/57°C fixed-temperature, rate-of-rise, and a 180°F/88°C fixed high-temperature detectors and are direct replacements for the SK-HEAT Series heat detectors. The point ID address, set using rotary decimal switches, provide specific detector locations. These thermal detectors provide effective, intelligent property protection in a variety of applications.

- SK-HEAT-W offers 135°F fixed thermal detection.
- SK-HEAT-ROR-W offers 135°F fixed and rate-of-rise thermal detection.
- SK-HEAT-HT-W provides fixed high-temperature detection at 190°F.

## FEATURES AND BENEFITS

- Designed to meet UL 268 7th Edition
- Sleek and stylish contemporary design
- Advanced thermal technology for fast response
- Fixed temperature model (SK-HEAT-W) factory preset to 135°F (57°C)
- Rate-of-rise model (SK-HEAT-ROR-W), 15°F (8.3°C) per minute
- High temperature model (SK-HEAT-HT-W) factory preset to 190°F (88°C)
- Addressable by device
- Rotary, decimal addressing (Refer to the Silent Knight panel manuals for device capacity)
- Two-wire SLC connection
- LEDs blink every time the unit is polled
- 360°-field viewing angle of the visual alarm indicators (two bi-color LEDs); LEDs blink green in Normal condition and turn on steady red in Alarm
- Integral communications and built-in device-type identification
- Remote test feature from the panel
- Built-in functional test switch activated by external magnet
- Walk test with address display (an address of 121 will blink the detector LED 12-(pause)-1)
- Low standby current
- Built-in tamper-resistant feature
- Designed for direct-surface or electrical-box mounting
- Sealed against back pressure
- Plugs into separate base for ease of installation and maintenance
- SEMS screws for wiring of the separate base
- Optional remote, single-gang LED accessory
- Optional sounder, relay, and isolator bases
- Optional flanged surface mounting kit

## **APPLICATIONS**

Use thermal detectors for protection of property. For further information, refer to manual I56-6529, Applications Manual for System Smoke Detectors, which provides detailed information on detector spacing, placement, zoning, wiring, and special applications.

## **INSTALLATION**

The SK-HEAT-W Series plug-in intelligent thermal detectors use a separate base to simplify installation, service, and maintenance. Installation instructions are shipped with each detector.

Mount base (all base types) on an electrical backbox which is at least 1.5" (3.81 cm) deep. For a chart of compatible junction boxes, see SK-61045.

**Note:** Because of the inherent supervision provided by the SLC loop, end-of-line resistors are not required. Wiring "T-taps" or branches are permitted for Style 4 (Class "B") wiring.

**Note:** When using relay or sounder bases, consult the SK-ISO installation sheet I56-3627 for device limitations between isolator modules and isolator bases.

## **PRODUCT LINE INFORMATION**

**SK-HEAT-W:** White, low-profile intelligent 135°F fixed thermal sensor

**SK-HEAT-ROR-W:** White, low-profile intelligent rate-of-rise thermal sensor

# SK-FIRE-CO-W

## Multi-Criteria Fire/CO Detector

### General Description

SK-FIRE-CO-W is a plug-in, addressable device that provides both fire and carbon monoxide (CO) detection. The detector combines four separate sensing elements to sense multiple components of a fire: smoke, CO, light/flame, and heat. This approach enables enhanced sensitivity to real fire with heightened immunity to nuisance particulates. For CO, the detector's electrochemical sensing cell creates a separate signal for life safety CO detection.

Multiple sensors and communication can greatly reduce nuisance alarms compared to single sensing methods. Sophisticated algorithms maximize the advantages of all four sensor types creating our best detection strategy offering heightened immunity to nuisance particulate and enhanced sensitivity to real fire.

- Photoelectric sensors detect airborne particles associated with smoke.
- Thermal sensors detect heat and rate-of-rise (135°F fixed temperature threshold).
- Infrared sensors discern light patterns in the environment as an additional data point for alarm determination.

This ability to reject certain nuisance alarm triggers, such as theater smoke, supports the use of the fire/CO detector in applications where moderate to heavy nuisance conditions exist that might cause single sensing detectors to false alarm.

UL models meet UL 268 7th edition and UL 521 listing requirements for fire detection and UL 2075 standard for system-connected life safety carbon monoxide detection.

Released through the incomplete burning of various fuels, CO is a colorless, odorless and deadly gas that is virtually impossible to detect with the human senses. Because the potential exists for dangerous levels of CO to accumulate in almost any building, legislation mandating the use of CO detection in commercial spaces continues to grow.

B200S series intelligent sounder bases are recommended for use with SK-FIRE-CO-W. These bases can generate either a Temp 3 pattern for fire or a Temp 4 pattern for CO alarm indication. The B200S series bases recognize the System Sensor synchronization protocol for use as a component of the general evacuation signal — along with other System Sensor Audible/Visible devices — when connected to a power supply or Fire Alarm Control Panel (FACP) output capable of generating the System Sensor synchronization pulses.

SK-FIRE-CO-W in B200S-WH sounder base

## PHYSICAL/OPERATING

### Dimensions:

Height: 2.7" (69 mm) installed in B200S series sounder base

Diameter: 6.875" (175 mm) installed in B200S series sounder base

Weight: 3.4 oz. (95 g)

**Operating Humidity Range:** 15% to 90% Relative Humidity, Non-condensing

**Operating Temperature Range:** 32°F to 100°F (0°C to 38°C)

**Air Velocity:** 0 to 4000 ft./min. (0 to 1219.2 m/min.)

## ELECTRICAL SPECIFICATIONS

**Operating Voltage Range:** 15 to 32 VDC

**Operating Current @ 24 VDC:** 200 uA (one communication every 5 seconds with green LED blink on communication)

**Maximum Alarm Current:** 2 mA @ 24 VDC (one communication every 5 seconds with red LED solid on)

**Maximum Current:** 4.5 mA @ 24 VDC (one communication every 5 seconds with amber LED solid on)

**Isolator Load Rating:** 0.0063

## CO MONITORING UL STANDARD REFERENCE

Alarm thresholds (in parts per million) are as follows for:

70 ± 5ppm: Detector response time 60 – 240 min.

150 ± 5ppm: Detector response time 10 – 50 min.

400 ± 10ppm: Detector response time 4 – 15 min.

## STANDARDS

Per UL standard 2075, the SK-FIRE-CO-W has have been tested to the sensitivity limits defined in UL Standard 2034.

UL Standard: UL 268 7th Edition

## AGENCY LISTINGS AND APPROVALS

The listings and approvals below apply to the SK-FIRE-CO-W. In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult the factory for the latest listing status.

UL: S6173

CSFM: 7272-0559:0517

## ORDERING INFORMATION

SK-FIRE-CO-W: Advanced multi-criteria fire/CO detector, white

**Protectowire®**  
**Linear Heat Detector**  
**EPR and EPR-M Series**  
Section: Conventional Initiating Devices

## GENERAL

The System Sensor/Protectowire Linear Heat Detector is a proprietary cable that detects heat conditions anywhere along its length. It is considered a normally-open contact device and as such can be interfaced to a Notifier intelligent addressable fire alarm control panel via monitor modules: FMM-1, FDM-1, FMM-101, and XP10-M. The sensor cable is comprised of two steel conductors individually insulated with a heat sensitive polymer. The insulated conductors are twisted together to impose a spring pressure between them, then wrapped with a protective tape and finished with an outer jacket suitable for the environment in which the detector will be installed.

Protectowire is a fixed temperature digital sensor and is therefore capable of initiating an alarm once its rated activation temperature is reached. At the rated temperature, the heat-sensitive polymer insulation yields to the pressure between conductors, permitting them to move into contact with each other, thereby initiating an alarm signal. It is not required that a specific length be heated in order to initiate an alarm, nor is system calibration necessary to compensate for changes in the installed ambient temperature. Protectowire Linear Heat Detector provides the advantages of line coverage with point sensitivity.

The Detector must be installed in continuous runs without taps or branches in accordance with locations and spacing prescribed by the approving authorities; NFPA 70 National Electrical Code, NFPA 72 National Fire Alarm Code or as determined by the local authority having jurisdiction. Except for zoning requirements (alarm source indication) the length of each run is limited, and controlled by the electrical characteristics of the control equipment to which the Detector is connected.

## FEATURES

- Up to 1,000 ft. of the Protectowire Linear Heat Detector may be connected to the initiating device circuit of the addressable monitor module.
- Eight different Linear Heat Detector models available, each packaged in 500 ft. rolls.
- Fixed Temperature Digital Sensor
- Line Coverage with Point Sensitivity
- Wide Range of Industrial Applications, such as Aircraft Hangars, Manufacturing Facilities, Warehouses, Tank Farms, Coal Conveyors, Refrigerated Storage, Dust Collectors, Cooling Towers, Tunnels, and Floating Roof Tanks.
- Good Abrasion Resistance
- Excellent Weathering Properties and High Temperature Performance.
- A comprehensive range of mounting and installation accessories are available.

## PROTECTOWIRE® LINEAR HEAT DETECTOR

## EPR Series

The EPR series contains an extruded flame retardant jacket of polypropylene elastomer with a special UV stabilizer added to enhance weathering performance. It is intended for a wide range of industrial applications and is characterized by high resiliency, good abrasion resistance, excellent weathering properties and exceptional high temperature performance. Messenger wire is also available for any model detector. It consists of high tensile strength stainless steel wire, which is wound around the detector. It is a support wire, which is designed to simplify the installation of the detector in areas where mounting is difficult due to the lack of appropriate support structures or mounting surfaces.

## EPR-M Messenger wire Series

Messenger wire (a Protectowire exclusive), is available with any of the four EPR models offered from Notifier. It consists of high tensile strength stainless steel wire, which is wound around the Detector at the rate of approximately one turn per foot (.3 m). It is a carrier or support wire which is designed to simplify the installation of the Detector in areas where mounting is difficult due to the lack of appropriate support structures or mounting surfaces. When using messenger wire to support the Detector, turnbuckles and eyebolts must be employed at each end of a straight run to place tension on the support wire.

NOTIFIER® is a Honeywell company.

This document is not intended to be used for installation purposes. We try to keep our product information up-to-date and accurate. ### Approvals/Maximum Listed Spacing

Type EPR Linear Heat Detector

UL (25 ft./7.6m)

FM (25 ft./7.6m)

The distance between detector runs shall not exceed the listed spacing. Reduced spacing may be required based upon factors such as ceiling height and construction, physical obstructions, air movement, or the authority having jurisdiction (AHJ). When Protectowire is used for sprinkler system activation, special Factory Mutual (FM) reduced spacing guidelines may also be applicable.

## **CHEMICAL RESISTANCE CHART FOR PROTECTOWIRE® TYPE EPR JACKET MATERIAL**

Ratings-Chemical Effect:

A - Little or no effect. ( < 20% Volume Swell )	C - Moderate effect. ( 40-60% Volume Swell )
B - Minor effect. ( 20-40% Volume Swell )	D - Severe effect - Not recommended ( > 60% Volume Swell )

(Immersion times were approximately 168 hours per ASTM D-471 at 23°C or as stated.)

## **Important Installation Information. Please Read!**

Protectowire Linear Heat Detector may be installed at the ceiling level to protect areas within buildings (area protection) in the same fashion as the more familiar spot type heat detectors. Please refer to the National Fire Alarm Code, NFPA 72, for basic information on the installation and spacing of linear heat detectors for area protection. For special applications where the Detector is installed close to the hazard, the manufacturer's recommendations and/or installation instructions should be followed. Whenever there is a choice between two or more possible installation procedures, the one which results in increased protection should be utilized.

For additional installation information on Protectowire Linear Heat Detectors please refer to the Installation/Operation/Maintenance Manual (MAN 2001E-0603) and the Important Installation Information document (DS-7736) on [www.Protectowire.com](http://www.Protectowire.com).

## Protectowire Accessories

System Sensor offers an assortment of approved Protectowire fasteners and splicing devices to facilitate installation for both standard and special applications. Protectowire approved fasteners are generally designed to lightly clamp the detector which enables a tension to be applied progressively. This method is better than arrangements which apply a high tensile load at the end of each run or clamp and compress the sensor cable so tightly that the inner insulation becomes damaged. To ensure a trouble-free installation, **only Protectowire approved fasteners should be used. The use of non-approved fasteners may physically damage the detector thereby causing "false alarms" and in some cases void the detector's warranty.**

### Accessories

#### Commercial Type Zone/End-of-Line Junction Box

Model	Description
ZB-4-QC-MP	Non-metallic Moisture proof Box with Compression terminals.
SR-502	Strain Relief Connector

#### Heavy Duty Type Zone/End-of-Line Junction Box

Model	Description
ZB-HD-4-QC	Fiberglass enclosure with compression terminals (NEMA 4x).

### Splicing Connectors and Termination Assemblies Flexible Leads

Model	Description
PFL	Used when terminating 2 conductor Protectowire Linear Heat Detector in constrained spaces such as pull station or smoke detector back boxes

### Splicing Connector

Model	Description
PWSC	Used when splicing standard 2 conductor Protectowire Linear Heat Detector.

### Splicing Tape/Sealant Tape

Model	Description
#35-White	Used to protect all splices of Protectowire Linear Heat Detector after sealing against moisture using SFTS-1-8-F Sealant Tape.
33+	Used to protect all splices of Protectowire Linear Heat Detector after sealing against moisture using SFTS-1-8-F Sealant Tape in cold environments as low as 0°F (-18°C).
SFTS-1-8-F	Used to seal all splices of Protectowire Linear Heat Detector against moisture.

## General Purpose Fasteners

### Clips

Model	Description
WAW-P	WAW Clips may be used for ceiling or wall mount applications, as well as at corners. Available in a polypropylene material.
OHS-1	Line Clip is used mainly as an intermediate fastener between corner mounted WAW clips which provide the main support.
OHS-SS	Stainless steel line clip with 1/4 inch hole. Used mainly as an intermediate fastener between corner mounted WAW clips which provide the main support.

### Insulated Standoff

Model	Description
TR-5G	The Insulated Standoff can be used to install Protectowire on or above conveyors or from other applicable mechanical structures.

### Cable Ties for Cable Mount

Model	Description
PLT1S-CO	Used with EMS Cable Mounts, constructed of weather resistant nylon suitable for outdoor use.

### Beam Clamp Assemblies

Model	Description
BC-2	The BC-2 Series Beam Clamp Assembly, consists of a beam clamp, WAW clip and snap button. BC-2 utilizes a plated steel clamp and is recommended for general indoor use. This fastener may be used for mounting Protectowire on cable trays, conveyors, angle irons, I-beams, bar joists.
BC-3P	The BC-3P consists of a beam clamp, a Polypropylene WAW clip (type P) and snap button. These fasteners are suitable for outdoor use. This fastener may be used for mounting Protectowire on cable trays, conveyors, angle irons, I-beams, bar joists.

### Adhesive Cable Mount/"L" Bracket

Model	Description
EMS-A-CO	Adhesive mounting system consists of EMS cable mounts, PLT cable ties and approved industrial adhesive. Constructed of black weather resistant nylon and suitable for outdoor use when used with approved adhesive.
RMC-2	Plated steel brackets used for mounting Protectowire to the rim seals on floating roof tanks.
RMC-3	Stainless steel brackets used for mounting Protectowire to the rim seals on floating roof tanks.

**Cable Tray Application Fasteners**

**Cable Tray Clip**

Model	Description
CC-2N	Will clamp to material from .06 to .16 of an inch thick and is designed to attach to the cable tray side rails and secure the Protectowire in the recommended sine wave pattern.
CC-2W	Will clamp to material ranging from .16 to .25 of an inch thick and is designed to attach to the cable tray side rails and secure the Protectowire in the recommended sine wave pattern.
CC-10N-S	The CC-10 Series Clips, are particularly useful in applications where excessive vibration may be encountered. CC-10N-S will clamp to material from .06 to .16 of an inch thick.
CC-10W-S	Are particularly useful in applications where excessive vibration may be encountered. CC-10W-S clamps to material ranging from .16 to .25 of an inch thick.

**Spring Clip**

Model	Description
HPC-2	The HPC-2 contains gripping teeth that will accommodate mounting surfaces such as cable trays, storage racks, and ceiling joists.

**Pipe Mounting Application Fasteners**

**Pipe Straps**

Model	Description
PM-3A	These double loop straps suitable for 3/4. to 2. pipe are made of black weather resistant nylon and may be used in temperatures ranging from -40°F (-40°C) to 185°F (85°C).
PM-3B	These double loop straps suitable for 2.5. to 3.5. pipe are made of black weather resistant nylon and may be used in temperatures ranging from -40°F (-40°C) to 185°F (85°C).
PM-3C	These 2 single loop straps suitable for 4. to 6. are made of black weather resistant nylon and may be used in temperatures ranging from -40°F (-40°C) to 185°F (85°C).

**Messenger Wire Applications**

**Eyebolt**

Model	Description
TR-4A	Used to attach one end of messenger wire to supporting structure. TR-4A is steel construction. TR-4A-S Stainless steel construction used to attach and tension one end of messenger wire to supporting structure.

**Turnbuckle**

Model	Description
TR-24	Used to attach and tension one end of messenger wire supporting structure.
TR-24-S	Stainless steel construction used to attach and tension one end of messenger wire to supporting structure.

**Typical Class B Protectowire installation using FMM-1 Monitor Module:**

ANY NUMBER OF UL LISTED CONTACT CLOSURE DEVICES MAY BE USED. DO NOT MIX FIRE ALARM INITIATING, SUPERVISORY, OR SECURITY DEVICES ON THE SAME MODULE.

# Indoor Selectable-Output Speaker Strobes and Dual Voltage Evacuation Speakers for Wall Applications

*System Sensor L-Series selectable output speaker strobes and dual-voltage evacuation speakers can reduce ground faults and enable faster installation with lower current draw and modern aesthetics.*

## Features

- Plug-in design and protective cover reduce ground faults
- Universal mounting plate with an onboard shorting spring tests wiring continuity before installation
- No extension ring required
- Field selectable candela settings on wall units: 15, 30, 75, 95, 110, 135, 185
- Automatic selection of 12- or 24-volt operation at 15 and 30 candela
- Rotary switch simplifies field selection of speaker voltage (25 and 70.7 Vrms) and power settings (1/4, 1/2, 1 and 2 watts)
- Speakers offer high fidelity and high volume sound output
- Compatible with System Sensor synchronization protocol
- Electrical compatibility with existing SpectrAlert and SpectrAlert Advance products
- Tamper-resistant construction
- Updated modern aesthetics

## Agency Listings

**The System Sensor L-Series** of speakers and speaker strobes reduce costly ground faults using a plug-in design and universal mounting plate that allow the installer to pre-wire mounting plates, dress the wires, and confirm wiring continuity before plugging in the speakers. In addition, a protective plastic cover prevents nicked wires by covering exposed speaker components.

These devices also enable faster installations by providing instant feedback to ensure that wiring is properly connected, rotary switches to select voltage and power settings, and 7 field-selectable candela settings for wall speaker strobes.

The low total harmonic distortion of the speaker offers high fidelity sound output while still offering high volume sound output for use in high ambient noise applications.

### System Sensor L-Series makes installation easy

- Attach a universal mounting plate to a 4 × 4 × 21/8 inch back box. Flush-mount applications do not require an extension ring.
- Connect the notification appliance circuit or speaker wiring to the terminals on the mounting plate.
- Attach the speaker or speaker strobe to the mounting plate by inserting the product tabs into the mounting plate grooves. Hinge the device into position to lock the product pins into the mounting plate terminals. The device will temporarily hold in place with a catch until it is secured with a captured mounting screw.

## L-Series Speaker and Speaker Strobe Specifications

### Architectural/Engineering Specifications

#### General

L-Series speaker and speaker strobes shall mount to a 4 × 4 × 2 1/8-inch back box. A universal mounting plate shall be used for mounting ceiling and wall products. The notification appliance circuit and amplifier wiring shall terminate at the universal mounting plate. Also, L-Series speaker strobes, when used with the Sync•Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync•Circuit Module, 12-volt rated notification appliance circuit outputs shall operate between 8.5 and 17.5 volts; 24-volt rated notification appliance circuit outputs shall operate between 16.5 and 33 volts. Indoor L-Series products shall operate between 32°F and 120°F from a regulated DC, or full-wave rectified, unfiltered power supply. Wall-mount speaker strobes shall have field-selectable candela settings including 15, 30, 75, 95, 110, 135, 185.

#### Speaker

The speaker shall be a System Sensor L-Series model \_\_\_\_\_ dual-voltage transformer speaker capable of operating at 25.0 or 70.7 nominal Vrms. It should be listed to UL 1480 and shall be approved for fire protective service. The speaker shall have a frequency range of 400 to 4,000 Hz and shall have an operating temperature between 32°F and 120°F. The speaker shall have power taps and voltage that are selected by rotary switches.

#### Speaker Strobe combination

The speaker strobe shall be a System Sensor L-Series model \_\_\_\_\_ listed to UL 1480 and UL 1971 and be approved for fire protective signaling systems. The speaker shall be capable of operating at 25.0 or 70.7 nominal Vrms selected via rotary switch, and shall have a frequency range of 400 to 4,000 Hz. The speaker shall have power taps that are selected by rotary switch. The strobe shall comply with the NFPA 72 requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system.

#### Synchronization Module

The module shall be a System Sensor Sync•Circuit model MDL3 listed to UL 464 and shall be approved for fire protective service. The module shall synchronize SpectrAlert strobes at 1 Hz. The module shall mount to a 4 1/16 × 4 1/16 × 2 1/8-inch back box. The module shall also control two Style Y (class B) circuits or one Style Z (class A) circuit. The module shall synchronize multiple zones. Daisy chaining two or more synchronization modules together will synchronize all the zones they control. The module shall not operate on a coded power supply.

### Physical Specifications

<b>Operating Temperature</b>	32°F to 120°F (0°C to 49°C)		
<b>Humidity Range</b>	10 to 93% non-condensing		
<b>Dimensions, Wall-Mount</b>	<b>Length</b>	<b>Width</b>	<b>Depth</b>
<b>SPL Speaker</b>	6.5 in, 165 mm	5 in, 127 mm	.97 in, 23 mm
<b>With Surface Mount Back Box</b>	6.6 in, 168 mm	5.1 in, 130 mm	3.2 in, 82 mm

# Indoor Selectable-Output Speaker Strobes and Dual Voltage Evacuation Speakers for Ceiling Applications

*System Sensor L-Series selectable-output speaker strobes and dual-voltage evacuation speakers can reduce ground faults and enable faster installation with lower current draw and modern aesthetics.*

## Features

- Plug-in design and protective cover reduce ground faults
- Universal mounting plate with an onboard shorting spring tests wiring continuity before installation
- No extension ring required
- Field selectable candela settings on ceiling units: 15, 30, 75, 95, 115, 150, and 177
- Automatic selection of 12- or 24-volt operation at 15 and 30 candela
- Rotary switch simplifies field selection of speaker voltage (25 and 70.7 Vrms) and power settings (1/4, 1/2, 1 and 2 watts)
- Speakers offer high fidelity and high volume sound output
- 520 Hz +/- 10% square wave tone capable with compatible FACP
- Compatible with System Sensor synchronization protocol
- Electrical compatibility with existing SpectrAlert and SpectrAlert Advance products
- Tamper-resistant construction
- Updated modern aesthetics

## Agency Listings

**System Sensor L-Series** of speakers and speaker strobes reduce costly ground faults using a plug-in design and universal mounting plate that allow the installer to pre-wire mounting plates, dress the wires, and confirm wiring continuity before plugging in the speakers. In addition, a protective plastic cover prevents nicked wires by covering exposed speaker components.

These devices also enable faster installations by providing instant feedback to ensure that wiring is properly connected, rotary switches to select voltage and power settings, and 7 field-selectable candela settings for both wall and ceiling speaker strobes.

The low total harmonic distortion of the SP speaker offers high fidelity sound output while still offering high volume sound output for use in high ambient noise applications.

### L-Series makes installation easy

- Attach a universal mounting plate to a 4 x 4 x 2 1/8 inch back box. Flush-mount applications do not require an extension ring.
- Connect the notification appliance circuit or speaker wiring to the terminals on the mounting plate.
- Attach the speaker or speaker strobe to the mounting plate by inserting the product tabs into the mounting plate grooves. Hinge the device into position to lock the product pins into the mounting plate terminals. The device will temporarily hold in place with a catch until it is secured with a captured mounting screw.

## L-Series Speaker and Speaker Strobe Specifications

### Architectural/Engineering Specifications

#### General

L-Series speaker and speaker strobes shall mount to a 4 × 4 × 2<sup>1</sup>/<sub>8</sub>-inch back box. A universal mounting plate shall be used for mounting ceiling and wall products. The notification appliance circuit and amplifier wiring shall terminate at the universal mounting plate. Also, L-Series speaker strobes, when used with the Sync•Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync•Circuit Module, 12-volt rated notification appliance circuit outputs shall operate between 8.5 and 17.5 volts; 24-volt rated notification appliance circuit outputs shall operate between 16.5 and 33 volts. Indoor L-Series products shall operate between 32°F and 120°F from a regulated DC, or full-wave rectified, unfiltered power supply. Speaker strobes shall have field-selectable candela settings including 15, 30, 75, 95, 115, 150, 177.

#### Speaker

The speaker shall be a System Sensor L-Series model \_\_\_\_\_ dual-voltage transformer speaker capable of operating at 25.0 or 70.7 nominal Vrms. It should be listed to UL 1480 and shall be approved for fire protective service. The speaker shall have a frequency range of 400 to 4,000 Hz and shall have an operating temperature between 32°F and 120°F. The speaker shall have power taps and voltage that are selected by rotary switches.

#### Speaker Strobe combination

The speaker strobe shall be a System Sensor L-Series model \_\_\_\_\_ listed to UL1480 and UL 1971 and be approved for fire protective signaling systems. The speaker shall be capable of operating at 25.0 or 70.7 nominal Vrms selected via rotary switch, and shall have a frequency range of 400 to 4,000 Hz. The speaker shall have power taps that are selected by rotary switch. The strobe shall comply with the NFPA 72 requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system.

#### Synchronization Module

The module shall be a System Sensor Sync•Circuit model MDL3 listed to UL 464 and shall be approved for fire protective service. The module shall synchronize SpectrAlert strobes at 1 Hz. The module shall mount to a 4<sup>11</sup>/<sub>16</sub> × 4<sup>11</sup>/<sub>16</sub> × 2<sup>1</sup>/<sub>8</sub>-inch back box. The module shall also control two Style Y (class B) circuits or one Style Z (class A) circuit. The module shall synchronize multiple zones. Daisy chaining two or more synchronization modules together will synchronize all the zones they control. The module shall not operate on a coded power supply.

### Physical Specifications

# Indoor Selectable-Output Horns, Strobes, and Horn Strobes for Wall Applications

*System Sensor L-Series audible visible notification products are rich with features guaranteed to cut installation times and maximize profits with lower current draw and modern aesthetics.*

## Features

- Updated Modern Aesthetics
- Small profile devices for Horns and Horn Strobes
- Plug-in design with minimal intrusion into the back box
- Tamper-resistant construction
- Automatic selection of 12- or 24-volt operation at 15 and 30 candela
- Field-selectable candela settings on wall units: 15, 30, 75, 95, 110, 135, and 185
- Horn rated at 88+ dBA at 16 volts
- Rotary switch for horn tone and two volume selections
- Mounting plate for all standard and all compact wall units
- Mounting plate shorting spring checks wiring continuity before device installation
- Electrically compatible with legacy SpectrAlert and SpectrAlert Advance devices
- Compatible with MDL3 sync module
- Strobes and Horn Strobes listed for wall mounting only
- Horns listed for wall or ceiling use

## Agency Listings

**The System Sensor L-Series** offers the most versatile and easy-to-use line of horns, strobes, and horn strobes in the industry with lower current draws and modern aesthetics. With white and red plastic housings, standard and compact devices, and plain, FIRE, and FUEGO-printed devices, System Sensor L-Series can meet virtually any application requirement.

The L-Series line of wall-mount horns, strobes, and horn strobes include a variety of features that increase their application versatility while simplifying installation. All devices feature plug-in designs with minimal intrusion into the back box, making installations fast and foolproof while virtually eliminating costly and time-consuming ground faults.

To further simplify installation and protect devices from construction damage, the L-Series utilizes a universal mounting plate for all models with an onboard shorting spring, so installers can test wiring continuity before the device is installed.

Installers can also easily adapt devices to suit a wide range of application requirements using field-selectable candela settings, automatic selection of 12- or 24-volt operation, and a rotary switch for horn tones with two volume selections.

## L-Series Specifications

### Architect/Engineer Specifications

#### General

L-Series standard horns, strobes, and horn strobes shall mount to a standard 2 x 4 x 1<sup>7</sup>/<sub>8</sub>-inch back box, 4 x 4 x 1<sup>1</sup>/<sub>2</sub>-inch back box, 4-inch octagon back box, or double-gang back box. L-Series compact products shall mount to a single-gang 2 x 4 x 1<sup>7</sup>/<sub>8</sub>-inch back box. A universal mounting plate shall be used for mounting ceiling and wall products for all standard models and a separate universal mounting plate shall be used for mounting wall compact models. The notification appliance circuit wiring shall terminate at the universal mounting plate. Also, L-Series products, when used with the Sync•Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync•Circuit Module, 12-volt-rated notification appliance circuit outputs shall operate between 8.5 and 17.5 volts; 24-volt-rated notification appliance circuit outputs shall operate between 16.5 and 33 volts. Indoor L-Series products shall operate between 32 and 120 degrees Fahrenheit from a regulated DC or full-wave rectified unfiltered power supply. Strobes and horn strobes shall have field-selectable candela settings including 15, 30, 75, 95, 110, 135, and 185.

#### Strobe

The strobe shall be a System Sensor L-Series Model \_\_\_\_\_ listed to UL 1971 and shall be approved for fire protective service. The strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system.

#### Horn Strobe Combination

The horn strobe shall be a System Sensor L-Series Model \_\_\_\_\_ listed to UL 1971 and UL 464 and shall be approved for fire protective service. The horn strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system. The horn shall have two audibility options and an option to switch between a temporal three pattern and a non-temporal (continuous) pattern. These options are set by a multiple position switch. The horn on horn strobe models shall operate on a coded or non-coded power supply.

#### Synchronization Module

The module shall be a System Sensor Sync•Circuit model MDL3 listed to UL 464 and shall be approved for fire protective service. The module shall synchronize Strobes at 1 Hz and horns at temporal three. Also, while operating the strobes, the module shall silence the horns on horn strobe models over a single pair of wires. The module shall mount to a 4<sup>11</sup>/<sub>16</sub> x 4<sup>11</sup>/<sub>16</sub> x 2<sup>1</sup>/<sub>8</sub>-inch back box. The module shall also control two Style Y (class B) circuits or one Style Z (class A) circuit. The module shall synchronize multiple zones. Daisy chaining two or more synchronization modules together will synchronize all the zones they control. The module shall not operate on a coded power supply.

### Physical/Electrical Specifications

<b>Standard Operating Temperature</b>	32°F to 120°F (0°C to 49°C)
<b>Humidity Range</b>	10 to 93% non-condensing
<b>Strobe Flash Rate</b>	1 flash per second
<b>Nominal Voltage</b>	Regulated 12 DC or regulated 24 DC/FWR <sup>1</sup>
<b>Operating Voltage Range<sup>2</sup></b>	8 to 17.5 V (12 V nominal) or 16 to 33 V (24 V nominal)
<b>Operating Voltage Range MDL3 Sync Module</b>	8.5 to 17.5 V (12 V nominal) or 16.5 to 33 V (24 V nominal)
<b>Input Terminal Wire Gauge</b>	12 to 18 AWG
<b>Wall-Mount Dimensions (including lens)</b>	5.6" L x 4.7" W x 1.91" D (143 mm L x 119 mm W x 49 mm D)
<b>Compact Wall-Mount Dimensions (including lens)</b>	5.26" L x 3.46" W x 1.91" D (133 mm L x 88 mm W x 49 mm D)
<b>Horn Dimensions</b>	5.6" L x 4.7" W x 1.25" D (143 mm L x 119 mm W x 32 mm D)
<b>Compact Horn Dimensions</b>	5.25" L x 3.45" W x 1.25" D (133 mm L x 88 mm W x 32 mm D)

1. Full Wave Rectified (FWR) voltage is a non-regulated, time-varying power source that is used on some power supply and panel outputs.

2. Strobe products will operate at 12 V nominal only for 15 cd and 30 cd.

# Outdoor, Selectable-Output Speaker Strobes and Dual-Voltage Evacuation Speakers for Wall Applications

*SpectrAlert® Advance outdoor, selectable-output speaker strobes and dual-voltage evacuation speakers meet virtually any outdoor application requirement.*

## Features

- Weatherproof per NEMA 4X, IP56
- Rated from -40°F to 151°F
- Plug-in design reduces ground faults
- Universal mounting plate with onboard shorting spring that tests wiring continuity before devices are installed
- Field-selectable candela settings: 15, 15/75, 30, 75, 95, 110, 115, 135, 150, 177, and 185
- Automatic selection of 12- or 24-volt operation at 15 and 15/75 candela
- Rotary switch for speaker voltage (25 and 70.7 Vrms) and power settings (1/4, 1/2, 1 and 2 watts)
- Compatible with System Sensor synchronization protocol and legacy SpectrAlert products
- Tamper-resistant construction
- Listed for ceiling or wall mounting

## Agency Listings

**SpectrAlert Advance** offers the broadest line of outdoor speakers and speaker strobes in the industry. From metal and plastic outdoor back boxes, to white and red plastic housings, to wall and ceiling mounting options, SpectrAlert Advance can meet virtually any application requirement.

Wall-mount outdoor speakers and speaker strobes can be used indoors or outdoors in wet or dry applications, and can provide reliable operation from -40°F to 151°F. These speakers provide a broad frequency response range, low harmonic distortion and maintain a high sound pressure level at all tap settings to provide accurate and intelligible broadcast of evacuation messages.

Like the entire SpectrAlert Advance line, wall-mount outdoor speakers and speaker strobes include a variety of features that increase application flexibility and simplify installation. First, field-selectable settings, including candela, speaker voltage and power settings, and automatic selection of 12- or 24-volt operation enable installers to easily adapt devices to meet requirements.

Next, these devices use a universal mounting plate with an onboard shorting spring that ensures wiring continuity before devices are installed, so installers can verify proper wiring without mounting the devices and exposing them to potential construction damage. Once the plates are mounted, all SpectrAlert Advance devices utilize a plug-in design with a single captured screw to speed installation and virtually eliminate costly ground faults.

Outdoor devices ship with weatherproof plastic back boxes (metal back boxes are available separately) that accommodate in-and-out wiring for daisy chaining devices. Plastic back boxes feature removable side flanges and improved resistance to saltwater corrosion. Knock-outs located on the back eliminate the need to drill holes for screw-in mounting. Plastic and metal weatherproof back boxes come with 3/4-inch top and bottom conduit entries and 3/4-inch knock-outs at the back. A screw-in NPT plug with an O-ring gasket for a watertight seal is included with each back box.

## SpectrAlert® Advance Outdoor Speaker and Speaker Strobe Specifications

### Architectural/Engineering Specifications

#### General

SpectrAlert Advance outdoor speakers and speaker strobes shall mount to a weatherproof back box. A universal mounting plate shall be used for mounting ceiling and wall products. The notification appliance circuit and amplifier wiring shall terminate at the universal mounting plate. Also, SpectrAlert Advance speaker strobes, when used with the Sync•Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync•Circuit Module, 12-volt-rated notification appliance circuit outputs shall operate between 8.5 and 17.5 volts; 24-volt-rated notification appliance circuit outputs shall operate between 16.5 and 33 volts. Outdoor SpectrAlert Advance products shall operate between –40°F and 151°F from a regulated DC, or full-wave rectified, unfiltered power supply.

#### Speaker

Speaker shall be a System Sensor SpectrAlert Advance Model \_\_\_\_\_ dual-voltage transformer speaker capable of operating at 25.0 or 70.7 nominal Vrms. Speaker shall be listed to Underwriters Laboratories Standard S4048 for outdoor fire protective signaling systems. Speaker shall have a frequency range of 400 to 4,000 Hz and shall have an operating temperature from –40°F to 150.8°F. Speaker shall have power taps and wattage settings that are selected by rotary switches. The speaker must be installed with its weatherproof back box in order to remain outdoor approved per UL listing S4048. The speaker shall be suitable for use in air handling spaces and wet environments.

#### Speaker Strobe Combination

The speaker strobe shall be a System Sensor Model \_\_\_\_\_ listed to UL 1638 and UL 1480 and be approved for fire protective signaling systems. Speaker shall be capable of operating at 25.0 or 70.7 nominal Vrms and shall have a frequency range of 400 to 4,000 Hz. Speaker shall have power taps that are selected by rotary switch. The strobe shall consist of a xenon flash tube with associated lens/reflector system and operate on either 12 or 24 volts. The strobe shall also feature selectable candela output, providing options for 15 or 15/75 candela when operating on 12 volts and 15, 15/75, 30, 75, 110, 115, 135, 150, 177 or 185 candela when operating on 24 volts. The strobe shall comply with the Americans with Disabilities Act requirement for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The speaker strobe must be installed with its weatherproof back box in order to remain outdoor approved per UL. The speaker strobe shall be suitable for use in wet environments.

### Physical Specifications

Operating Temperature	–40°F to 151°F (–40°C to 66°C)

**DESIGN:** Models SPR, SPW, SPRV, and SPWV SpectrAlert Speakers - Rectangular enclosure.  
Models SPCW, SPCR, SPCWV, and SPCRV SpectrAlert Speakers with round enclosure.  
Models SPSR, SPSRH, SPSW, SPSW-ALERT, SPSW-CLR-ALERT, \*SPSWK-CLR-ALERT, SPSWH, SPSRV, and SPSWV SpectrAlert Speaker/Strobe with rectangular enclosure. Models SPSCR, SPSCRH, SPSCW, \*SPSCWK-CLR-ALERT, SPSCWH, SPSCRV, SPSCRH, SPSCWV, and SPSCWVH SpectrAlert Speaker/Strobe with round enclosure. Model SPSCW-CLR-ALERT Speaker/Strobe. Model SPSW-ALERT has amber lens and is intended for non-fire use.  
All models identified are intended for indoor use mounted on the wall or ceiling. Models with a "K" in the suffix are suitable for indoor or outdoor use with an operating temperature rating of -40°C to +66°C (-40°F to +151°F) and have a NEMA 4X enclosure rating when used with models PWBB, PWBBW (wall) or the model PWBBCW (ceiling) plastic weatherproof back boxes or with Model MWBBW (Wall), MWBB (Wall) or MWBBCW (Ceiling) metal weatherproof back boxes. Models with a "- P" in the suffix have plain housings with no lettering on the enclosure. Models not containing "- P", in the suffix have English lettering reading "FIRE" on the housing. Refer to listee's data sheet for additional detailed product description and operational considerations.

**RATING:** Nominal Voltage: 25 Vrms or 70 Vrms  
Power Settings: ¼, ½, 1, 2 Watts  
Frequency Range: 400 - 4000 Hz

**INSTALLATION:** In accordance with listee's printed installation instructions, NFPA 72, applicable codes & ordinances and in a manner acceptable to the authority having jurisdiction.

**MARKING:** Listee's name, model number, electrical rating and UL label.

**APPROVAL:** Listed as speaker/strobes when used with separately listed compatible fire alarm control units. Suitable for wall or ceiling mount.  
These speaker/strobes do not generate a distinctive three-pulse temporal code pattern (for total evacuation) as required per NFPA 72, 2010 edition. If required, the appliances must be used with a fire alarm control unit that can generate the temporal pattern signal.

# SK-MONITOR

## Intelligent Monitor Module

The SK-MONITOR is an addressable monitor module for use with Honeywell Silent Knight Series fire alarm control panels (FACPs). The SK-MONITOR is intended for use in intelligent, two-wire systems, where individual address of each module is selected using the built-in rotary switches.

The SK-MONITOR supports Class A supervised or Class B supervised wiring to the load device. Conventional 4-wire smoke detectors can be monitored for alarm and trouble conditions.

### INSTALLATION

The SK-MONITOR mounts directly into a 4" square electrical box. The box must have a minimum depth of 2-1/8". A surface mount electrical box (System Sensor® PN SMB500) is available from Silent Knight.

**SK-MONITOR**

## FEATURES & BENEFITS

- Single contact monitor
- Support for Class A and Class B wiring
- Fully supervised
- Panel controlled status LED that flashes green in normal state and is solid red in alarm
- SEMS screws for easy wiring
- UL Listed
- Rotary address switches for fast installation

## SK-MONITOR Technical Specifications

### PHYSICAL

**Height:** 4.5"H x 4" W x 1.25"D (11.4 X 10.2 X 3cm)

**Shipping Weight:** 6.3 oz (196 g)

### ELECTRICAL

**Operating Voltage:** 15 – 32VDC

**Current Draw (LED on):** 5.0mA max

**Operating Current (LED flashing):** 375µA

**Standby Current:** 400µA max @ 24 VDC (one communication every 5 sec with 47K EOL); 550µA max @ 24 VDC (one communication every 5 sec with EOL <1K)

5.5 mA (with LED latched on)

**LED Current:** 5.5 mA (with LED latched on)

End-of-Line Resistance: 47KΩ

**Initiating Device Circuit Wiring Resistance:** 1,500Ω max

**SLC Loop Resistance:** 40Ω max.

### ENVIRONMENTAL

**Operating Temperature:** 32°F – 120°F (0°C – 49°C)

**Humidity:** 10% – 93% non-condensing

### ORDERING INFORMATION

**SK-MONITOR:** Monitor Module

### ACCESSORIES

**SMB500:** 4" Square surface mount electrical box

### COMPATIBILITY

**The SK-MONITOR is compatible with the following Honeywell Silent Knight fire alarm control panels:**

**6820:** Addressable fire alarm control panel

**6820EVS:** Addressable fire alarm control panel with an emergency mass notification system.

**6808:** Addressable fire alarm control panel

**6700:** Addressable fire alarm control panel

**5700:** Addressable fire alarm control panel

**5808:** Addressable fire alarm control panel

**5820XL:** Addressable fire alarm control panel

**5820XL-EVS:** Addressable fire alarm control panel with an emergency mass notification system

# SK-MINIMON

## Intelligent Mini Monitor Module

The SK-MINIMON is an addressable monitor modules for use with the Honeywell Silent Knight fire alarm control panels (FACPs). The SK-MINIMON acts as an interface to contact devices, such as waterflow switches and pull stations. The SK-MINIMON supports Class B supervised wiring to the load device. Conventional 4-wire smoke detectors can be monitored for alarm and trouble conditions.

The SK-MINIMON can be mounted in a single gang junction box directly behind the monitored device. Its small size and light weight allow it to be installed without rigid mounting requirements.

### INSTALLATION

The SK-MINIMON can be mounted in a single gang junction box directly behind the monitored device. Its small size and light weight allow it to be installed without rigid mounting requirements.

**SK-MINIMON**

## FEATURES & BENEFITS

- Single contact monitor
- SK-Minimon support for Class B (Style B) contact monitor wiring
- Small and lightweight size allows for flexible mounting options
- Rotary address switches for fast installation
- UL Listed
- CSFM Listed
- FM Approved

## SK-Relaymon-2

### Intelligent Dual Monitor Module with Two Relay Outputs

The SK-Relaymon-2 module is capable of monitoring two separate Class B circuits simultaneously, combined with two Form C relay outputs. The SK-Relaymon-2 saves you time and money by reducing what may have taken four modules to accomplish into a single module footprint

For more information about the Intelliknight system, or to locate your nearest source, please call 800-328-0103.

#### Description

The SK-Relaymon-2 combines two relay outputs and two monitor inputs into one module device. The module is capable of Class B supervised wiring to the monitored devices. It also contains Form C relay contacts allowing the panel to switch the contacts on command. Each monitor input provides an interface between a fire alarm control panel and one or more normally open contact-type devices. Each relay output has its own green LED.

#### Features

- Monitor two circuits, with unique addresses, simultaneously
- Two Form C relay contacts with each having a unique address
- Fully supervised support for Class B input wiring
- Relay programming is completely flexible – can be mapped to zone conditions
- Individual LED's for each monitored input and relay output
- Attractive ivory cover plate
- Rotary address switches for fast installation
- SEMS screws for easy wiring
- UL listed
- CSFM: 7300-0559:0155

**SK-Relaymon-2**

#### Installation

The SK-Relaymon-2 mounts directly into a 4" square electrical box. The box must have a minimum depth of 2-1/8". A surface mount electrical box (System Sensor® PN SMB500) is available from Silent Knight

#### Compatibility

The SK-Relaymon-2 is compatible with the following Intelliknight FACP's:

5820XL  
5820XL-EVS  
5808  
5700

## Model SK-Relaymon-2

### Intelligent Dual Monitor Module with Two Relay Outputs

**Addendum-001 | 03-118779**  
**AS REVISED**

## Specifications

## Physical

Size: 4.675" H x 4.275" W x 1.4" D (mounts to a 4" square by 2 1/8" deep box)

Shipping Weight: 6.3oz (178.6 grams)

## Electrical

Operating Voltage: 15 – 32 VDC

SLC Standby and Alarm Current: 1.3 mA

## Environmental

Operating Temperature: 32°F to 120°F (0° to 49° C)

Relative Humidity: 10% - 93% non-condensing

## Relay Contact Ratings

Current Rating	Maximum Voltage	Load Description	Application
2A	25 VAC	PF = 0.35	Non-coded
3A	30 VAC	Resistive	Non-coded
2A	30 VAC	Resistive	Coded
0.46A	30 VAC	(L/R = 20ms)	Non-coded
0.7A	70.7 VAC	PF = 0.35)	Non-coded
0.9A	125 VAC	Resistive	Non-coded
0.5A	125 VAC	PF = 0.75	Non-coded
0.3A	125 VAC	PF 0.35	Non-coded
